

New base station of Ireland Communications

Overview

The newly constructed Cable Landing Station, Killala, Co. It is the Irish base for the 287 communications cables at the bottom of the ocean, including two newly constructed transatlantic cables, the first to be built in nearly fifteen years. This is one of the next-generation sub-sea cable. Amazon and SpaceX are looking to deploy satellite ground stations in Ireland for their respective Kuiper and Starlink satellite units. The Broadcasting Authority of Ireland (BAI) (Irish: Údarás Craolacháin na hÉireann) is the regulator of both public and commercial broadcasting sector in Ireland. A subsea telecoms cable, known as IRIS, has been installed between Galway and Iceland. Eir's FTTH network allows download speeds of up to 1 Gbit/s and upload speeds of 100 Mbit/s.

Ireland's telecommunications network is a modern digital system connected by an extensive national fibre optic network with multiple high-capacity fibre optic links to the UK, Continental Europe, North America and with dedicated capacity on routes to Asia and other parts of the globe. There is an open and competitive telecommunications market regulated by ComReg. However, the fixed-line market is still dominated by the incumbent operator Eir.
