

# No bracket installation photovoltaic

## Overview

---

Non-penetrating solar mounting systems are based on a special bracket design that secures the solar modules without penetrating the roof, making it an ideal solar mounting solution for buildings with sensitive roofs or lease agreements that prohibit roof penetrations. Ground-mounted racks are also available. Solar Installed around the world Individual roof manufacturer endorsements Find the Metal Roof Solar Mounting System that Best Suits Your. Picture this: A crew installing solar panels without sparks flying, without protective masks, and without that distinctive burnt-metal smell. But why should. Mounting solar panels on a roof surface to create a solar power system is known as rooftop solar mounting. This unique system eschews the conventional need for drilling, which can compromise roof integrity.
