

# Offshore wind capacity by country

## Offshore wind capacity by country

### [Offshore wind capacity by country, 1991-2030 - Charts - Data](#)

World Energy Outlook special report, Offshore Wind 2018, Offshore wind capacity by country, 1991-2030 : United Kingdom, Germany, Netherlands, France, Belgium, Denmark, and other countries.

### [Offshore Wind Energy Statistics By Capacity And Country \(2025\)](#)

The overview generated by this data speaks for the number and capacities of offshore wind farms by country in the course of having a balance reflecting the overall global picture as

### Global Statistics

These countries demonstrate that the world as a whole can achieve a 40-50% share of wind power in total electricity generation, as outlined by the WWEA in a long-term scenario.

### Wind Power by Country 2026

Also includes information on each country's actual yearly production ...

### Global Offshore Wind Report

In 2023, 25 new offshore wind farms with a total capacity of 9.8 gigawatts (GW) were taken into operation, increasing the global off-shore wind capacity to a total of 67.4 GW.

### Global Wind Power Tracker

The Global Wind Power Tracker (GWPT) is a worldwide dataset of utility-scale, on and offshore wind facilities. It includes wind farm phases with capacities of 10 megawatts (MW) or more.

### Installed wind energy capacity

Cumulative installed wind energy capacity including both onshore and offshore wind sources, measured in gigawatts (GW).

[Offshore wind farms by key country 2025, Statista](#)

As of April 2025, 138 wind farms were operating in China. China has the largest number of offshore wind farms, followed by the United Kingdom, Vietnam, and Germany. The higher wind speeds

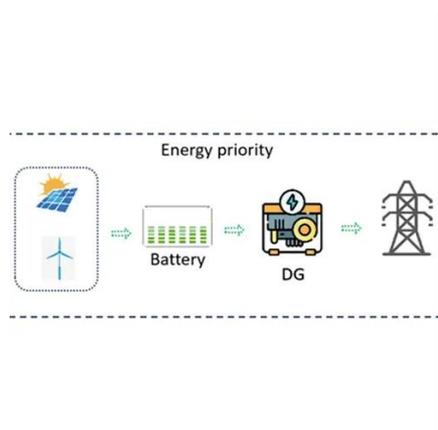

### GLOBAL OFFSHORE WIND REPORT 2025

Our report finds that there is now already 83 GW of offshore wind installed worldwide, keeping the lights on for 73 million households, and powering countries' economic development. ...

### Wind power by country

WindEurope (formerly known as The European Wind Energy Association) has estimated that 230 gigawatts of wind capacity will be installed in Europe by 2020, consisting of 190 GW onshore and 40 ...

### Wind Power by Country 2026

Also includes information on each country's actual yearly production of wind-generated electricity, as well as the amount of electricity generated in offshore wind farms as compared on onshore farms.
