

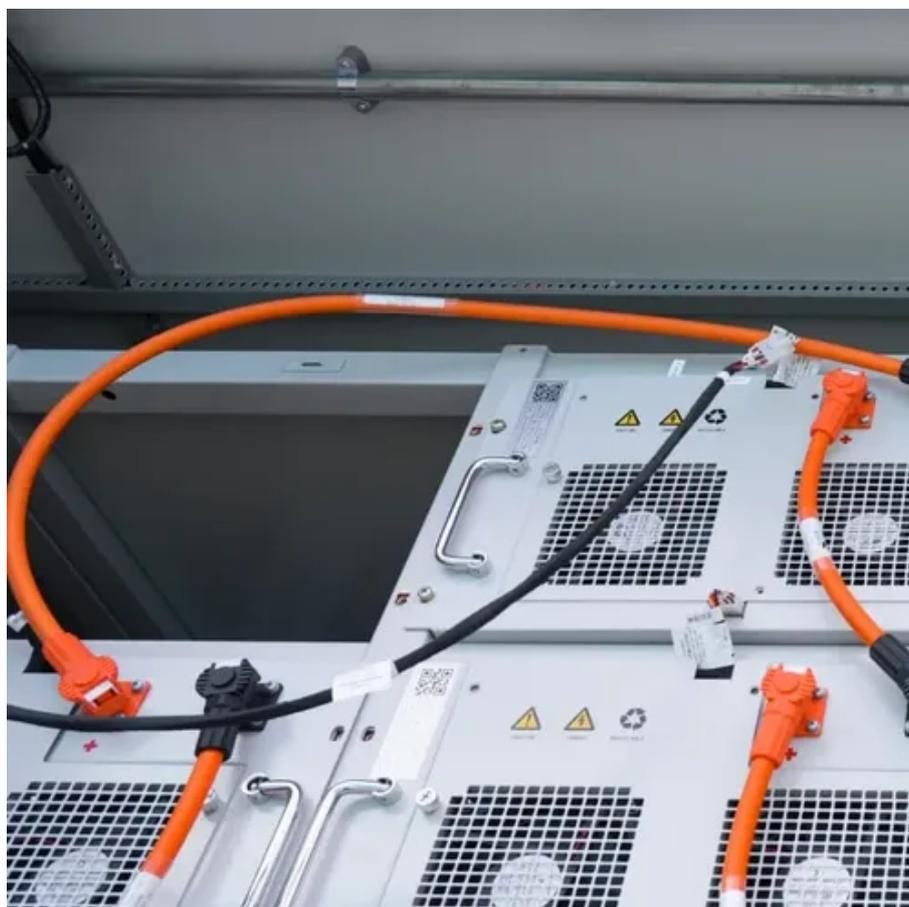

# Photovoltaic bracket price drawing

## Overview

---

Photovoltaic bracket product drawings The PV module mounting system engineered to reduce installation costs and provide maximum strength for parallel-to-roof, tilt up, or open structure mounting applications. It's more like comparing desert cacti to tropical palm trees. The price spectrum ranges from ¥35 basic brackets to ¥2,800+ industrial-grade systems. Each product complies. To accurately determine the cost associated with solar brackets, it is essential to consider various parameters that influence pricing. Understand the type of solar bracket required, as different installations (roof-mounted or ground-mounted) necessitate distinct types. Consider the material. Photovoltaic modules are usually priced in terms of the rated module output (\$/watt). The price per watt for larger and relatively straightforward projects are often within plants that run on coal and natural gas.
