Overview

These benchmarks help measure progress toward goals for reducing solar electricity costs and guide SETO research and development programs. Average price of solar modules, expressed in US dollars per watt, adjusted for inflation. Data source: IRENA (2025); Nemet (2009); Farmer and Lafond (2016) - Learn more about this data Note: Costs are expressed in constant 2024 US\$ per watt. Global estimates are used before 2010; European market. Data collected on both the monthly and annual Form EIA-63B are protected from disclosure of individual company data. The tables in this report are: Table 1. Value and average. 2024 ATB data for utility-scale solar photovoltaics (PV) are shown above, with a base year of 2022. NLR's PV cost benchmarking work uses a bottom-up. Polysilicon A small number of new polysilicon orders have recently been concluded at lower price levels, mainly involving mid-tier producers. Definition of PV Grade: Polysilicon chunk with high purity can be used directly to produce Solar PV.
