## Overview

---

This article will guide you through the process of repairing cracked solar panels, focusing on two primary methods: covering the panel with laminating film and applying polyurethane. Check each product page for other buying options. Learn more [Need help?](#)

. Solar panels use five major types of rubber products: Elasto Proxy can supply solar panel manufacturers with all of these rubber products. We're also ready to support companies that make solar canopy, solar carport, and solar awning systems. Rubber is a dielectric material that blocks the flow of electric current. Our rubber mats provide superior insulation for use near high-voltage equipment. KRAITEC® top PV is a structural protection mat for protection against mechanical damage on high-quality PVC- seals as defined in DIN 18531, 18533 and 18535. KRAITEC® top PV features a composite film. LAMATEK™ currently offers the products listed below for the photovoltaic industry: Double sided, adhesive foam tape bonds and seals photovoltaic laminate in the aluminum frames. Our mess-free PV module frame tape is more efficient than liquid or butyl adhesives.
