

# Photovoltaic panels solar water heater

## Overview

---

Solar water heaters—sometimes called solar domestic hot water systems—can be a cost-effective way to generate hot water for your home. They can be used in any climate, and the fuel they use—sunshine—is free. There are two types. Choosing between solar thermal collectors and a solar powered electric water heater setup with a heat pump is one of the most consequential decisions for homeowners pursuing renewable hot water in 2025. Batch collectors, also called.
