

Prices and profits of photovoltaic panels

Overview

These benchmarks help measure progress toward goals for reducing solar electricity costs and guide SETO research and development programs. Note: Costs are expressed in constant 2024 US\$ per watt. Solar photovoltaic module prices refer to the cost of the solar panel itself, and do not include installation or other system. Solar panel costs range from \$16,600 to \$20,500 for the average 6.5 kW system, but prices can vary from as little as \$7,700 for smaller solar systems to upward of \$34,700 for larger systems. Department of. This guide will brief you on what is the actual photovoltaic panels price in 2025 for households or business uses. It is the combination of both hard and soft costs. They're mainstream, and for many households, they're one of the smartest long-term investments you can make.
