

Quote for solar container shipping costs

Overview

Short version: From 2024, it costs between \$2,800 and \$5,500 to ship a 20-foot container of solar panels around the world, depending on origin, destination, fuel prices, and demand. The 40-foot container, which is the one used for larger installations, ranges from \$4,500. Thinking of going solar and want to know how much it will cost to ship those panels in a shipping container?

You're not alone. With renewable energy on the rise, particularly among off-gridders, businesses, and environmentally minded homeowners, solar panel shipping logistics are growing more. Importing solar panels from China involves critical decisions about shipping methods, costs, and timing. This guide helps B2B buyers—distributors, installers, and project developers—choose the right freight solution based on order volume, budget, and deadlines. Our free container shipping calculator delivers accurate container rate estimates.
