

Replace your own solar generator

Overview

This tutorial will provide all the details you need to assemble your own solar generator. You may make your own source of power sustainable, you know it, and you are. Portable, weatherproof, and ready-to-rock — a homemade solar generator can meet all your power needs in and around your boat, camper, or cabin. Do you have what it takes to make one yourself?

My family owns a cozy off-grid cabin in the hills, but since there's no electricity, I'd only stay there. Most people purchase solar generators off-the-shelf, but some positives come with putting a solar-powered generator together yourself, particularly if you're interested in learning more about how solar power works. Solar generators are perfect for emergencies, camping, or reducing electricity bills.
