Resort uses 10mwh smart pv-ess integrated cabinet

Overview

To preserve the resort's natural atmosphere, Hanersun designed a customized energy solution, covering the entire process from system design, product configuration, and construction to integration and long-term maintenance. The project is scheduled to connect to the grid in the first. On January 30, Hanersun andJingxian State-Owned Forestry Development Co. signed a cooperation agreement on developing an integrated PV-ESS solution for the Jingxian Songyu Resort Hotel. The project is fully invested and constructed by Hanersun, highlighting the company's EPC. Energy Cube 50kW-100kWh C&i ESS integrates photovoltaic inverters and a 100 kWh energy storage system. This. This system is highly suitable for use in microgrids, remote areas, industrial parks, EV charging stations, and residential buildings. The PV+ESS+Charger Solution integrates the PV system and energy storage system (ESS) with a charger to charge vehicles, which also helps save electricity costs. uses standard battery modules, PCS modules, BMS, EMS and other systems to form standard containers to build large-scale grid-side energy storage projects. It meets the application needs of regional power.
