

Rwanda invests in solar power

WORKING PRINCIPLE

Overview

Rwanda plans \$16 billion in solar investments to achieve universal electricity access by 2030, despite financing and policy barriers. This ambitious government plan is not just about powering homes; it's a strategic move to reduce reliance on fossil. Rwanda is accelerating its solar power development, aiming to provide electricity to every household nationwide by 2030. In a world rapidly shifting toward renewable energy, the East African nation is making a bold commitment to harness the sun as the foundation of its energy future. With 82% of the land area receiving an average of 4.5 kWh per m² per day and approximately 5 peak sun hours, solar energy has a huge potentiality in Rwanda. 0.50 MW originating from 3 solar power plants namely Jali power plant generating 0.25MW, Rwamagana Gigawatt.
