

Small Solar Power System Cost

Overview

Most homeowners spend between \$12,600 and \$33,376 to install a complete residential solar system in 2026, with the national average at \$19,873 before incentives. Solar panels can lower your electricity bill by 75% or more, but the upfront investment is significant. This typically translates to about \$2.50 per watt of installed capacity (more on price per watt below). To find the most up-to-date solar panel costs in 2025, we compared research from the U.
