

# Solar Energy Storage in Western Europe

## Overview

---

TotalEnergies and Canadian Solar are boosting the future of energy storage in Europe with major projects in Germany and the UK. The contents of this publication do not necessarily reflect the position or opinion. MUNICH, Germany (Wednesday 7th May 2025): New analysis reveals another year of record installations for European\* battery storage, despite slower year-on-year growth, according to the latest European Market Outlook for Battery Storage. With storage capacity forecast to grow by a further 115% by 2030, this will play a crucial role in Europe as it has experienced rapid growth. The report covers market access, policy overview and market analysis in 14 countries, including Belgium, Finland, France, Germany, the United Kingdom, Greece, Italy, Ireland, the Netherlands, Norway, Poland, Spain, Sweden and Switzerland. According to the European Commission.

## Solar Energy Storage in Western Europe

### [European Energy inaugurates Danish solar-storage hybrid park](#)

European Energy has officially opened its Kvested energy park in Denmark, a 101-MW photovoltaic (PV) park with 200 MWh of batteries touted as Northern Europe's largest combined ...

### [Europe set to hit storage, with more expected by 2030](#)

Energy storage will reach beyond 215 GW by 2030 - with battery storage alone exceeding 160 GW. By the end of the decade, storage will be deployed at a rate of 20-25GW per year, which is more than ...

### [Overview of Energy Storage Deployment in Europe](#)

Key findings highlight the growing expectations of lithium ion battery storage, the continued importance of pumped-storage hydropower and the significant potential of energy storage to support the ...

### [EU installs record 27 GWh of battery storage capacity in 2025](#)

The EU installed a record 27.1 GWh of new battery storage capacity in 2025, driven by utility-scale projects that accounted for over half of new additions as the bloc races to build the ...

### [New tool maps Europe's real-time sustainable energy storage data](#)

It offers near real-time data on the deployment of storage facilities across Europe, including an interactive dashboard and map, and identifies all the technologies, from battery storage ...

### [Axpo builds Europe's largest single-span solar roof system](#)

03.02.2026 - Axpo subsidiary Urbasolar has begun construction of Europe's largest single-span rooftop solar system. The system is being built on the 136,000 m<sup>2</sup> roof of the OMEGA logistics building in ...

### [The Future of Energy Storage in Europe: A Growing Frontier](#)

TotalEnergies and Canadian Solar are boosting the future of energy storage in Europe with major projects in Germany and the UK. As the European Union accelerates its transition to ...

### [New report: European battery storage grows 15% in 2024, EU ...](#)

With solar energy mainstreaming across the continent, now is the time for European decisionmakers to put batteries at the centre of a flexible, electrified, energy system.

### [Energy storage market analysis in 14 European countries: future](#)

In the future, Germany, Italy and Poland will be the hot spots in the European energy storage market. The German energy storage market is expected to grow rapidly from 8 GW in 2023 to 38 GW in ...

### [How Europe's Solar Storage Revolution Is Reshaping Grid Stability](#)

These installations represent just the beginning of Europe's energy storage revolution. With decreasing battery costs and advancing technology, more utility-scale projects are being ...
