

Solar Irrigation Control System

Overview

Solar irrigation controllers are devices that utilize solar energy to power an irrigation system. These controllers regulate the water flow based on pre-programmed schedules or environmental triggers, ensuring optimal watering while minimizing water waste. That's where the Ancnoble GG-005C-1 Irrigation Timer & Controller shines. This model features a unique motion sensor-based irrigation system that detects plant movements, like the wind blowing, to decide when and how much to water. I saw it in action on a breezy afternoon. This unit's ability to run off ambient light—no direct sunlight needed—makes setup a breeze and very reliable, even. They can be used as temporary irrigation on construction sites, traffic medians, roundabouts, greenhouses, and in parks. Battery and solar powered controllers also work where. Solar Automatic Drip Irrigation System, Harness Sunshine or External Power for Indoor and Outdoor Use, Rain or Shine! Anti-Siphoning, Supports Up to 15 Potted Plants, User-Friendly Design. 6 Timing Modes, Easy DIY Installation.
