

Solar Photovoltaic Panel Cleaning System

Overview

Many solar panel cleaning kits come with extendable poles so you can clean panels on rooftops without climbing, soft-bristle brushes that won't scratch the surface, and even water-fed systems to rinse off dirt without leaving streaks. We offer a fully automated solar panel cleaning system with no moving parts that you can control from your phone. RST NightWash™ keeps your panels clean all the time. Designed in full compliance with manufacturers' requirements. These include snowstorms, rain, storms, and hail, as well as, depending on the location, soot, pollen, dust from road traffic, leaves, needles, or bird droppings. Heliotex cleans solar panels like no other company, offering state-of-the-art automatic systems that configure for your specific soiling environment and feature security. According to the European Solar Thermal Industry Association, each additional kilowatt-hour (kWh) of solar production added to the electrical grid would decrease CO₂ emissions by 238 g per kWh. With the potential to improve energy output by 30% through effective dirt removal, these systems are essential for both commercial and residential applications.
