

Solar bracket photo taking action

Overview

Bracket your exposures by shooting at various shutter speeds. To capture as much information and detail as you can, set your camera to the highest resolution (jpeg) or take uncompressed images (tiff or raw). Play around with the shutter speed for. In this video Rick and I will share tips and methods to practice and photograph both the partial and total eclipse. While my personal solar eclipse photography experiences have been limited, I do have some practical advice to share for photographing the upcoming solar. When shooting still images or video of a solar eclipse, one rule is paramount: special-purpose solar filters must always remain on cameras and telescopes during the partial phases (including the annular phase of an annular eclipse). You can seriously hurt your eyes.
