

Solar cell power generation equipment price

Overview

5 kW solar system, you'll spend anywhere from \$16,600 to \$20,500 before accounting for tax credits or rebates. Solar panels cost between \$2. Department of Energy (DOE) Solar Energy Technologies Office (SETO) and its national laboratory partners analyze cost data for U. These benchmarks help measure progress toward goals for reducing solar electricity costs. Average price of solar modules, expressed in US dollars per watt, adjusted for inflation. Data source: IRENA (2025); Nemet (2009); Farmer and Lafond (2016) - Learn more about this data Note: Costs are expressed in constant 2024 US\$ per watt. This work informs research and development by identifying drivers of cost and competitiveness for solar technologies. This typically translates to about \$2. The average price range for such systems is generally between \$8,000 and \$15,000, dependent on the quality and type of components used, along with installation fees and warranties.
