

# Solar panels 400 square meters

## Overview

---

The area of a 400W solar panel is around 1. It is a slightly larger size than the 300W panel and is suitable for small commercial applications as well as small-scale residential applications. It is a good size for those who need a larger system but not too big for. These are the practical solar panel dimensions by wattage from solar panels that are actually sold on the market (made by SunPower, Panasonic, QCells, REC Solar, Renogy, Bluetti, and so on). But "ideal" rarely exists in real life. Your roof's orientation, local climate, shading, and even the dust on your panels can slash that output by 30-50%. Using an average retail price of \$500 per. A 400 watt solar panel is an attractive choice for individuals and businesses aiming to contribute to environmental sustainability while reducing energy expenses.
