

Solar panels laid on top of container

Overview

Laying solar panels on the roof of a container not only gives it new functions, but also transforms it into a small independent power generation unit. Are you considering mounting solar panels on a shipping container and wondering what to keep in mind?

This article offers a concise overview to help you understand the key considerations and shows you some real-world examples. Can you put solar panels on a shipping container roof?

Absolutely!. Scroll to the bottom of any page to find a sun or moon icon to turn dark mode on or off! Mounting several panels on top of a shipping container, without penetrating the roof?

Please picture a standard 40ft shipping container (8 ft wide). I want to use something. This product is the support rafters and leg mounts sized for fifteen 60 or 72 cell modules. Design support one rows of 12 modules in portrait when placed on a single width container structure. Package include 9 support rafters, 18 leg footings for corner-mount to standard shipping container, cross. From an over-thinking mind comes a channel dedicated to over-thought projects, including an off-grid workshop and tiny house build deep in the desert near Joshua Tree, CA! As a product designer/engineer and world-wide exhibited kinetic artist, you might say I have a unique perspective on things ;). Turn your container roof into a power station - without welding, cutting, or complicated installs! Our solar panel mounting kits are designed specifically for shipping containers.
