### [Urgent action needed to reverse ecological collapse of Doñana](#)

On World Wetlands Day, WWF presents a comprehensive review of scientific evidence on the current deterioration of Doñana - a World Heritage site and one of Europe's most important wetlands.

### **Tablas de Daimiel National Park**

OverviewConservation issuesHistoryCharacteristicsBiological patrimony

In recent years demand for water for agriculture in the area surrounding the park has reduced the amount of wetland. Overexploitation of water resources has caused the water-table to drop. The key aquifer ("aquifer 23") has not been able to refill because of the overuse of water created by the "Badajoz (irrigation) Plan" started in 1952, and of the administrative apathy and lack of suppleness faced with cereal farmers lobbies. ...
