

Specifications of Photovoltaic Bracket Slider Nut

Overview

The main body of this nut is made of good quality aluminum (EN AW-6061), the ball and spring inside is made of stainless steel, this M8 sliding nut can offer great stability and long life-span for photovoltaic racking systems. The solar sliding nut M8 with ball is a fastening accessory for PV module installation sliding in aluminum alloy rail. They come in various types dependin on the mounting surface (roof,ground,pole,etc. Rails: Rails are long,horizontal str ctures attached to the solar panels using clamps at are the components of a solar mounting system?

Solar mounting systems. Did you know that 23% of solar panel maintenance issues stem from improperly sized fasteners?

As solar installations surge globally—with the market projected to grow 8. Let's unpack. Through scientific management, HANYANG fastener Ltd company has been obtained ISO 9001 certificate of Quality Managerment System, SGS and BV international certificate system of Made in China. The width range of our products can be divided into auto fasteners, mechanical fasteners, construction. With rich esperience in aluminum processing,good and fully automated production lines, a perfect supply chain,and strict design and verification,our products hao won national and international recognition and perference in a very short time. Here are some of the main accessories: Four-hole triangle, eight-hole triangle: used for the basic connection of photovoltaic brackets. Snap nut, spring nut, plastic.
