

Stolen photovoltaic panel case

Overview

A significant theft has disrupted the renewable energy sector in Manzanillo, Granma, where local authorities reported that 38 photovoltaic panels and 20 steel beams were stolen from a solar park. The panels were taken from a facility in the southern part of the city, near. According to the International Energy Agency (IEA), global solar photovoltaic (PV) capacity has been growing at an average annual rate of around 33% over the past decade. Solar energy is fast becoming an integral part of the global energy mix, and this has been sparked by the need for sustainable and renewable sources of energy. The United States, for example, has approximately 2,500 solar farms alone while the UK's installed solar capacity hit 15 GW with more than. In June this year, a farmer who had £70 000 worth of high-tech equipment stolen believes a gang spied on his premises with a drone. He said the thieves, who were caught on CCTV, knew the machines' precise location and how to gain access. Schools and churches, generally unoccupied at night, have been hit hard by this brand of theft theft, but no buildings are especially immune.
