

# The angle of the Avaru Solar PV panels

## Overview

---

The optimum tilt angle is calculated by adding 15 degrees to your latitude during winter, and subtracting 15 degrees from your latitude during summer. r panel faces the Sun perpendicularly. Photovoltaic (PV) performance and efficiency are highly affected by its angle of til r the Chandigarh region has been done. It can be seen that the. Generally, in the Northern Hemisphere, the ideal azimuth is  $180^\circ$  (true south), and the best fixed-tilt angle is equal to the site's latitude. However, this is just a baseline. To be more specific, the orientation refers to the horizontal direction of solar panels in relation to the equator.
