

There is solar power installed on board

Overview

If your RV or trailer's manufacturer installed a power inverter in your unit, then yes! However, most units do not come equipped with this feature “off-the-lot”. We recommend contacting your dealer to see if you have this equipment installed. Want to learn more?

. Electrical energy is the lifeblood for any modern sailor, whether it's a day trip or a long-distance cruise. Between the navigation systems essential to safety, the daily comfort provided by domestic equipment and the autonomy sought away from ports, on-board energy management represents a major. The DC power in your batteries allows you to run lights, fans, slide-outs, and 3-way fridges. Whether to gain autonomy, ensure reliable electrical supply on board, or reduce dependence on equipped ports, installing solar panels on a boat meets practical needs, far beyond simple. Installing solar cells on a vessel requires careful planning, expert knowledge, and the right tools to ensure efficiency and safety. Select appropriate solar panels, 3. As soon as light hits the panel and activates it, the cells produce electrical current. Once limited to land-based applications or costly experimental projects, this technology has gradually made inroads into the marine field, thanks to significant advances such as improved.
