

# Uninterruptible power supply required for nas storage construction

## Overview

---

A UPS (Uninterruptible Power Supply) protects your NAS from sudden power loss, ensuring graceful shutdowns and preserving data integrity. Having a battery backup in place has numerous benefits: Prevents RAID corruption and drive damage from abrupt shutdowns or brown outs. However, by following a few key guidelines, you can ensure that your NAS is protected against power outages and other issues. This is where an uninterruptible power supply (UPS) comes into play. It's a power supply that ensures. A sudden outage or power fluctuation doesn't just shut down your NAS — it can cause corrupted data, lengthy RAID rebuilds, and unexpected downtime for your team or clients. This article explores why pairing NAS with an uninterruptible power supply (UPS) is essential, supported by industry data and real-world scenario HOME / Do NAS. Choosing the right Uninterruptible Power Supply (UPS) for Synology Network Attached Storage (NAS) is crucial to protect data from power interruptions and ensure system stability. For 1-2 bay NAS devices, from 500-850VA should be enough (with desktop PC and router connected).

## Uninterruptible power supply required for nas storage construction

### [Best UPS for NAS: Keep the lights on when the power goes out](#)
