

Uzbekistan vivint solar

Overview

The program launched in April 2023 and provides a subsidy of 1,000 soums (about \$0.08) for every 1 kWh of electricity. Uzbekistan has great renewable energy potential, especially for solar energy. With a view to ensuring energy security while optimising renewable energy resources, the government has implemented a wide range of measures to promote the integration of renewable energy into the energy system and. Uzbekistan is making significant strides in its transition to renewable energy, driven by a clear vision for a sustainable future and supported by robust government initiatives. This article will delve into the latest statistics on solar energy development in Uzbekistan, reviewing the key. Uzbekistan paid out UZS 209.7mn) in state subsidies for household solar electricity in 2025, with 45,381 individuals compensated for power generated by rooftop solar panels and supplied to the national grid, according to the State Tax Committee. According to the State Tax Committee, 45,381 individuals received budget subsidies for electricity. More than 35,000 households in Uzbekistan received state subsidies for exporting surplus electricity from rooftop solar systems between January and September, says the State Tax Committee, as participation in the Solar Home program accelerates nationwide.
