

# What shoes should I wear to prevent slipping on photovoltaic panels

## Overview

---

Always wear soft-soled shoes to minimize pressure and avoid stepping directly on the cells. For solar installers, the right pair of shoes is more than just a comfort item it's essential safety gear. Whether climbing ladders, walking rooftops, or navigating uneven terrain, installers need footwear that supports both performance and protection. Many installers struggle to find footwear that ticks all these. But, with protective footwear, you'll ensure your feet are shielded from anything that could fall on them and cause damage to them. By selecting boots with slip-resistant soles that offer superior traction on various surfaces like metal roofing, solar installers can safely maneuver and maintain. CAMEL CROWN Men's Hiking Shoes are an excellent choice. They offer breathability, non-slip soles, and durability. These features are essential for outdoor work. Instead, step on the frame or support structures.
