

# Which German telecommunications company has the most green base stations

## Overview

---

Since 2020, Vodafone's entire network in Germany has been running on 100% renewable electricity. By eliminating fossil fuels from their operations, the provider has drastically reduced its carbon. The telecommunications provider O2 Telefónica has put Bavaria's first mobile phone base station into operation that operates completely independently of the general power supply. Germany is served by an extensive system of automatic telephone exchanges connected by modern networks of fiber-optic cable, coaxial cable, microwave radio relay, and a domestic satellite system; cellular. Germany's 1&1 has redesigned the plan to install 5G base stations on its new mobile network. The company will deploy in total 1,207 locations for antennae by the end of 2023, and a further 3,000 sites per year starting in 2024. A small group from the TelecomTalk. Germany, home to some of Europe's largest telecom providers, is pioneering a green transition. Companies like Vodafone, Telekom, and 1&1 are stepping up with tangible sustainability initiatives, aiming to make the internet not just faster, but greener. Instead, the site relies on a combination of solar and wind power, supported by fuel cell.

## Which German telecommunications company has the most green base stations?

### [O2 Telefonica already deployed 10,000 base stations in Germany](#)
