

Wind power generator explosion

Overview

A wind turbine at a northern Colorado wind farm folded in half and caught fire Thursday morning, startling neighbors who heard banging noises prior to the collapse. The incident was reported at 8 a. Oil and grease from the generator caught fire. Montage of individual and multiple wind turbines being felled by Controlled Demolition, Inc. Scott Trimble | strimble@syracuse.com) Get Photo Onlookers watch as the seven wind turbines that make up the Madison Wind Farm were imploded Wednesday, September 17, 2025. The collapse occurred on Tuesday at the Frontier II wind farm operated by local utility Deriva Energy, which bought the site from its developer Duke Energy. These incidents often result from brake system failures leading to overspeed, gearbox malfunctions causing fires, or lightning.
